Body-centred countertransference
involves a psychotherapist's
experiencing the physical state of
the patient in a clinical context.
Also known as somatic
countertransference, it can
incorporate the therapist's gut
feelings, as well as changes to
breathing, to heart rate and to
tension in muscles. Wed, 18 Apr

I originally wrote to you June 6,
2016 here and asked you about
your influences, whereupon you
generously cited some as well as
noting the importance of writers.
